2007

market  
tabloid celebrating 75 years

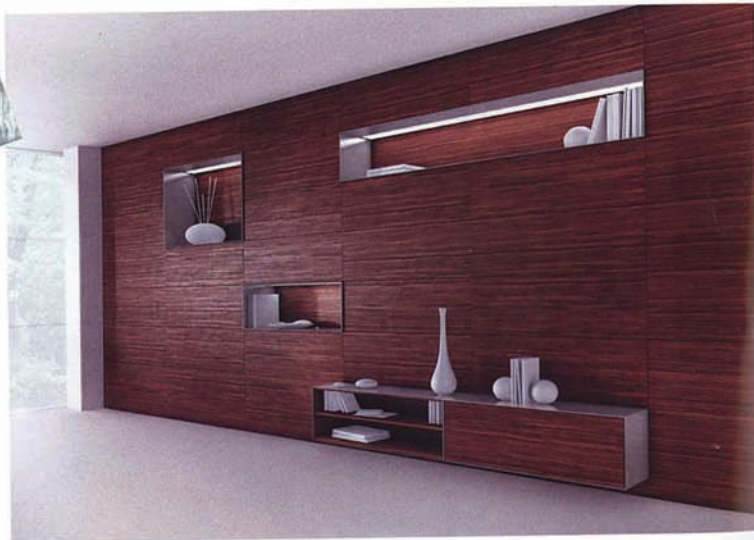

### Hakatai Enterprises

Pearl farmers provide the freshwater shells; Hakatai infuses them with one of four luminous colors, including pale-blue **Moonlight**, to create its Seashell series. The net-mounted square mosaics array 3/4-inch tiles with 1/16-inch grout lines and are perfect for walls that are not exposed to direct sunlight. 701 Mistletoe Road, Ashland, OR 97520; 888-667-2949; hakatai.com. **circle 862**

### Lualdi

An anodized-aluminum skeleton supports Giacobone e Roj's **Domino** integrated modular wall system, featuring ebony-finish solid paneling, hanging storage, and inset components. The interiors are equipped with built-in illumination to enhance depth perception and highlight decorative objects on display. 13 Via Piemonte, 20010 Mesero, Milan, Italy; 39-02-9789248; lualdi.com. **circle 858**

### Lutron Electronics

A command center for a room's lighting design, the **Grafik Eye QS** facilitates preset lighting levels with backlit buttons that can be custom engraved. **Sivoia QS**, an optional column of extra buttons, allows integration of window-shade controls. The unit is available in more than three dozen colors to coordinate with practically any décor. 7200 Suter Road, Coopersburg, PA 18036; 877-258-8766; lutron.com. **circle 861**

### Window Modes

Gossamer **Windowsheer** fabrics interweave poly, raffia, and abaca, a sheer banana-related fiber. Once carefully selected, the natural fibers are hand-knotted to create exquisite window shades or sliding panels in custom widths. 979 Third Avenue, Suite 1615, New York, NY 10022; 212-752-1140; windowmodes.com. **circle 860**

### Karcher

Sighted occupants will view the **Lima ER82B** and **Panama ER81B** as attractive, if conventional, levers. But the visually impaired will appreciate the way this satin stainless-steel hardware presents a semi-concealed plate for messages printed in Braille. 32 Raiffeisenstrasse, 74906 Bad Rappenau, Germany; 49-72-6491-6452; karcher-design.com. **circle 859**
